

A PCA plot showing the first two principal components, PC1 (21.3%) on the x-axis and PC2 (15.2%) on the y-axis. The plot displays two distinct clusters of data points, colored orange and green, indicating separation between two groups. The orange cluster is generally located in the upper-left and lower-right regions, while the green cluster is concentrated in the center and lower-left regions. The axes range from approximately -500 to 500 on the x-axis and -500 to 500 on the y-axis.
